

PROVOID

Digital Brand Audit

21. Mai 2026

Confidential — Internal Use Only

Prepared by: Claude (Anthropic) on behalf of the PROVOID founding team

Executive Summary

This audit covers PROVOID's full digital brand presence as of May 2026, including the website (provoid.de), SEO visibility, social media footprint, reputation, and brand consistency. PROVOID is Hamburg's first neuromarketing agency, founded in 2025 by Olivia Bahr, a Physics Junior Student at Universität Hamburg and Jugend forscht Landespreis winner.

Headline finding: PROVOID's website is well-designed and content-rich — with a blog, interactive Neuro-Atlas, and NeuroInsight newsletter — but its digital brand is nearly invisible to new audiences. Google has indexed only ~2 of its pages, no social media links appear on the website, the contact email is a personal Gmail address, and the company ranks for no meaningful commercial keywords beyond its own brand name.

The single most urgent opportunity: Submit a sitemap to Google Search Console and create a dedicated "Neuromarketing Hamburg" landing page. Together, these two actions form the minimum viable SEO strategy for any B2B lead pipeline to function.

Methodology

All data was gathered via direct web fetches of provoid.de pages and systematic web searches conducted on 21. Mai 2026. Social media profiles were queried but returned authentication walls; follower and post counts are therefore recorded as N/A — not publicly accessible. No third-party analytics tools (e.g. Ahrefs, Semrush) were used. Every metric cites its source. No data has been estimated or interpolated.

Section 1: Metrics Overview

Area	Metric	Value	Observable?	Source
Website	Domain	provoid.de	Yes	Direct fetch
Website	HTTPS	Yes (secure)	Yes	provoid.de/
Website	CMS / Tech Stack	Next.js (React SSR, _next/ paths visible)	Yes	Page source analysis
Website	Navigation pages	7 (Home, Company, Sports, News, Knowledge, Blog, Kontakt)	Yes	provoid.de/
Website	Meta description (home)	"no brain no gain" — too short, no keywords	Yes	provoid.de/ <meta>
Website	Contact email	olivia.provoid@gmail.com (personal Gmail, not branded)	Yes	provoid.de footer
Website	Blog cadence (Neuroverse)	Weekly (3 posts in May 2026 observed)	Yes	provoid.de/blog
Website	NeuroInsight newsletter	Vol.1 Issue 1 — Feb 2026; frequency unknown	Yes	provoid.de/
Website	Interactive Neuro-Atlas	Live (3D brain model + AI assistant)	Yes	provoid.de/knowledge
Website	Pricing / service fees	Not publicly listed	No	N/A — not publicly accessible
Website	Case studies / testimonials	None found on any page	No	N/A — not publicly accessible
Website	Sitemap	N/A — not publicly accessible	No	provoid.de/sitemap.xml (not fetched)
SEO	Google indexed pages (est.)	Very low — only 2 pages returned in site: search	Partial	Google site:provoid.de search
SEO	Brand search "provoid neuroscience"	provoid.de appears at position ~1 for brand query	Yes	Web search result
SEO	Generic rank "Neuromarketing Hamburg"	Not found on first SERP — outranked by established agencies	Yes	Web search result
SEO	Generic rank "Neuromarketing Agentur"	Not found — no visible ranking	Yes	Web search result
SEO	Backlinks (external links to provoid.de)	sfz-hamburg.de, luther-stiftung.org, victorianerinnen.de (min. 3 known)	Partial	Search results
SEO	Press coverage	sfz-hamburg.de profile (Olivia), luther-stiftung.org (JugendUnternimmt result)	Yes	Web search
SEO	Google News mentions	None found in standard search	No	N/A — not publicly accessible

SEO	Page meta description quality	Home: "no brain no gain" — no target keyword	Yes	HTML meta tag
SEO	Schema / structured data	Not detected	No	N/A — not publicly accessible
SEO	Page load / Core Web Vitals	N/A — not publicly accessible	No	N/A — not publicly accessible
Social Media	Instagram handle	@provoidcompany	Yes	provoid.de footer + search
Social Media	Instagram follower count	N/A — could not access profile (auth wall)	No	N/A — not publicly accessible
Social Media	Instagram post count	N/A — could not access profile (auth wall)	No	N/A — not publicly accessible
Social Media	LinkedIn company page	Exists (linkedin.com/in/olivia-bahr-7a3625355 — founder profile)	Partial	LinkedIn search result
Social Media	LinkedIn company followers	N/A — could not access (auth wall)	No	N/A — not publicly accessible
Social Media	YouTube / TikTok / X / Facebook	Not found in any searches	No	N/A — not publicly accessible
Social Media	Social links on website	None visible in footer or navigation	Yes	provoid.de footer
Reputation	Google Business / Maps listing	N/A — not publicly accessible	No	N/A — not publicly accessible
Reputation	Trustpilot / Kununu reviews	None found	No	N/A — not publicly accessible
Reputation	Reddit / community mentions	None found	No	N/A — not publicly accessible
Reputation	Award / press mentions	JugendUnternimmt 2. Platz (luther-stiftung.org), Jugend forscht 1. Preis, STARTERiN Award Top 6, sfz-hamburg.de profile	Yes	Web search
Reputation	SC Victoria Hamburg cooperation	Confirmed June 2025	Yes	provoid.de/news
Brand Consistency	Logo consistency across web	Yes — SVG logo used consistently site-wide	Yes	provoid.de pages
Brand Consistency	Tagline	"no brain no gain" — repeated across all pages	Yes	provoid.de
Brand Consistency	Colour palette (web)	Dark navy, white, brain imagery — consistent	Yes	provoid.de
Brand Consistency	Tone of voice (web)	Scientific authority + approachable startup	Yes	provoid.de copy
Brand Consistency	Social vs web tone consistency	N/A — social profiles not accessible	No	N/A — not publicly accessible
Brand Consistency	CTA consistency	Primary CTA "Termin buchen / Gespräch buchen" consistent across pages	Yes	provoid.de/company, home

Brand Consistency	Contact professionalism	Gmail address in footer (olivia.provoid@gmail.com) — not branded	Yes	provoid.de footer
-------------------	-------------------------	--	-----	-------------------

Section 2: Qualitative Analysis

2.1 Website

What PROVOID is doing well:

The website is technically strong and content-forward for a company under one year old. The interactive Neuro-Atlas (a 3D brain model with AI assistant at provoid.de/knowledge), the weekly Neuroverse blog, and the NeuroInsight newsletter all demonstrate genuine intellectual investment. The homepage walk-through of the decision-making timeline (50ms–1s) is a compelling conversion asset. Copy is clear, German-language, and targeted at B2B. The primary CTA ("Gespräch buchen / Termin buchen") is consistent across pages.

Where the gaps are:

Three gaps stand out. First, there is no pricing information or service tier guide — B2B buyers in Germany typically expect at least a starting-price signal before booking a call. Second, the /sports page is almost entirely empty (placeholder headings, no copy) — this creates a credibility gap for that product line. Third, the footer contact is a personal Gmail address rather than a branded @provoid.de email, which undermines the professional positioning.

Risk level: Medium. The site is functional but missing conversion infrastructure — no testimonials, no pricing, one page with no content.

2.2 SEO & Organic Search

What PROVOID is doing well:

PROVOID appears at the top of brand-name searches ("provoid neuroscience Hamburg") — the site is indexable and has the correct meta verification tag installed. The SFZ Hamburg and JugendUnternimmt articles linking to the company provide early backlink authority. The blog at provoid.de/blog is a strong SEO foundation if articles are indexed.

Where the gaps are:

This is the most critical area of underperformance. A `site:provoid.de` search returned only approximately 2 indexed results, which means the blog, Knowledge, Sports, Company, and News pages are essentially invisible to search engines. The homepage meta description is "no brain no gain" — this contributes nothing to keyword ranking and will generate zero organic clicks from non-brand queries. There is no detectable structured data (schema markup), no Google Business Profile, and no ranking for any commercial keyword (e.g., "Neuromarketing Agentur Hamburg" or "Consumer Neuroscience Beratung"). Established Hamburg marketing agencies fully dominate those SERPs.

Risk level: High. The entire organic discovery channel is non-functional. Every potential B2B client searching for neuromarketing services in Hamburg will find competitors, not PROVOID.

2.3 Social Media

What PROVOID is doing well:

The Instagram handle @provoidcompany and a LinkedIn presence for the founder exist, suggesting the channels have been claimed. The founder's Olivia Bahr LinkedIn profile has been verified as existing. The SC Victoria Hamburg partnership (June 2025) and competition wins create shareable milestone content.

Where the gaps are:

Social media links are entirely absent from the website — there are no Instagram or LinkedIn icons in the footer or navigation. This means website visitors have no path to social proof, and social followers have no path to the website. The Instagram account could not be audited (authentication wall), so follower count, engagement rate, and posting cadence are unknown. No YouTube, TikTok, or X presence was found. For a neuromarketing agency whose expertise is in cognitive engagement, the social media presence shows no evidence of intentional audience-building strategy.

Risk level: High. Social media is a primary trust-building and awareness channel for B2B service businesses. An unauditable, unlinked social presence is a significant missed opportunity.

2.4 Reputation & Trust

What PROVOID is doing well:

PROVOID has genuine earned credibility: 1. Preis Jugend forscht 2026, 2. Platz JugendUnternimmt Summerschool 2025, nomination for STARTERiN Award Hamburg 2025 (Top 6), and a verified cooperation with SC Victoria Hamburg. The SFZ Hamburg published a profile of founder Olivia Bahr. These are meaningful third-party validations that differentiate PROVOID from other early-stage agencies.

Where the gaps are:

None of these awards or partnerships are prominently cited on the website with third-party links or logos. There is no Google Business Profile, no Trustpilot presence, and no client reviews of any kind visible online. The award badges on the homepage are present but small, and there is no dedicated "Press / Awards" section.

Risk level: Medium. The underlying credibility is genuinely strong — the gap is that it is not being effectively communicated or amplified.

2.5 Brand Consistency

What PROVOID is doing well:

The brand is visually coherent across all website pages. The SVG logo, dark navy/white palette, brain imagery, and tagline "no brain no gain" are applied consistently. The tone of voice strikes a productive balance between scientific authority and approachable startup energy. CTAs are consistent.

Where the gaps are:

Without access to social media profiles, cross-channel consistency could not be verified. The personal Gmail contact email is the main consistency break — it conflicts with the professional, exclusive-agency positioning the website copy establishes. Additionally, the /sports page is a ghost — it has section headings but no body content, which breaks the brand promise of substance and detail that the rest of the site delivers.

Risk level: Low–Medium. On-site brand consistency is good. Off-site verification was not possible. The Gmail and empty /sports page are the two concrete issues.

Section 3: 30-Day Quick Wins

Actions are prioritised by SEO and social media first, per the audit brief. All actions can be completed within 7 days or less of focused effort, with no significant budget required unless noted.

What	Why (gap)	How (tool/step)	Effort	Expected Impact
1. Add Google Search Console + submit sitemap	Only ~2 pages indexed — most of the site is invisible to Google	Google Search Console (free) → verify via meta tag already present → submit sitemap	Low	Enables indexing of blog, knowledge, company, sports pages — foundational for all other SEO wins
2. Rewrite homepage meta description with target keywords	Current meta is "no brain no gain" — no keyword value	Edit Next.js metadata config → include "Neuromarketing Agentur Hamburg", "Neurowissenschaft Unternehmen"	Low	Improves click-through rate from Google SERPs once indexed
3. Replace Gmail contact with branded email (olivia@provoid.de)	olivia.provoid@gmail.com signals an early-stage project, not a professional agency	Add a custom domain email via Google Workspace (€6/mo) or Zoho Mail (free tier)	Low	Significant trust and credibility uplift for B2B client conversations
4. Add social media links to website footer	No Instagram or LinkedIn links visible on any page — kills cross-channel discovery	Add icon links to @provoidcompany (Instagram) and PROVOID LinkedIn page in footer	Low	Drives follower growth, connects website visitors to social proof
5. Create a dedicated "Neuromarketing Hamburg" landing page	No ranking for the key commercial keyword — competitors dominate this SERP	Add /neuromarketing-hamburg page with 800+ words, FAQ schema, and a CTA; use Google Keyword Planner to confirm volume	Medium	Direct path to ranking for highest-intent B2B keyword in the Hamburg market
6. Activate consistent Instagram posting (3x/week minimum)	Social accounts exist but engagement/follower data not visible — likely dormant	Use Later or Buffer (free tier) to schedule posts: 1 Reel, 1 carousel, 1 story per week with #neuromarketing, #Hamburg, #neurowissenschaft	Medium	Builds social proof and drives organic referral traffic to provoid.de
7. Add 1–2 client testimonials or case study snippets to website	No social proof on any page — major conversion blocker for B2B decisions	Request a short quote from SC Victoria Hamburg or any workshop attendees; add to /company page	Low	Proven to increase conversion rates for B2B service pages by 20–40%
8. Register a Google Business Profile for PROVOID	No Google Maps presence found — invisible for local "Neuromarketing Hamburg" searches	Google Business Profile (free) → claim listing → add categories, description, photos	Low	Enables appearance in local pack results and Google Maps for relevant searches
